PROJECTS

WEATHER APP [LINK](#)

Html Css JavaScript Bootstrap

- A simple and user-friendly weather application which lets the users know the weather information of any city across the globe and also various parameters.
- This application has been built using Html, Css, JavaScript, Bootstrap and OpenWeather API.
- It fetch the data from the API and display on the UI.

STUDENT DATABASE MANAGEMENT SYSTEM [LINK](#)

React.js JavaScript Html Css

- With this project I am aiming to provide a simple yet powerful interface for managing student records with full CRUD (Create, Read, Update, Delete) functionality.
- The application is designed to facilitate efficient data management.
- All the data is also present on the JSON-server

TO-DO APP [LINK](#)

React.js Html Css JavaScript

- Designed to help user to manage tasks, organize activities, and keep track of things they need to do.
- Users can easily add new tasks to their to-do list, including details such as task name and their description.
- Users can view, edit, and delete tasks as needed. They may also be able to organize tasks into different categories or lists for better organization.
